

LIGHT SOURCES – low power

HL2012-001 (MES in vial w/sockets) HL2012-101 (MES in vial w/terminals)

IEC manufactures several low power light sources for general basic electricity experiments. These are low cost light sources housed in simple vials. See also HL2010-001 and HL2011-001 for low power light sources where the lamp is exposed.

HL2012-001 holds an MES lamp protected inside a transparent container. The top of the container is fitted with 4mm sockets for connection.

HL2012-101 holds an MES lamp protected inside a transparent container. The top of the container is fitted with 4mm spin free terminals for connection.
